

WHAT IS PCR?

(POST-CONSUMER RECYCLED)

PCR: Short of Post-Consumer-Recycling, is recycled plastic made from discarded items, such as plastic milk and drinks and is an environmentally sustainable solution for reusing single-use materials that would otherwise be disposed of in landfill sites.

The production of PCR begins with the collection and sorting of these discarded plastics in commercial and residential recycling programs. The recovered items are ground, washed, dried and pelletised-ready to be used again in the future manufacturing.

WHAT IS **refillable packaging?**

The concept of refillable is: buy the original bottle once and then refill it from something more eco-friendly. Usually this means a combination of less plastic, less wasted lorry space and sometimes less water used for the same amount of the product.

The benefit of refillable packaging

- Refillable bottles can drastically reduce the number of single-use bottles being thrown out.
- Increasing the share of refillable and decreasing marine plastic pollutions of bottles is achievable.
- Potential cost reductions: Though switching to recyclable packaging may require an initial investments, it's possible you can reduce costs by reducing the amount of material that needs to be reduced overall.
- Improves the consumer experience by offering products from known brands in durable, refillable packaging with an enhanced look, feel or functionality.

WHAT IS Metal-Free Pump?

No metal spring, No metal bead

- EcoFriendly Pump, easy to be recycled.
- Ingredients have No chance to touch directly with the metal.
- The pumps are free from metal, making them safe from chemical danger and ideal for lotions, shampoos, body gels, and liquid soaps.
- Streamline the ease of recycling by using the metal free components for your formulas.

Pumps update from inside spring pump to outside spring one, from a traditional priming to a NO direct touch pump with ingredients.
And now pumps change to all metal-free as a more sustainable package for eco-friendly life.

Silicone Series

Environmental protection material,
suitable for all kinds of contents,
widely used for body, hair & skin care,
or even food.

硅胶系列---环保级材料，适用于各种内容物，
广泛用于洗护护肤类，甚至食品类。

Capacity: 55ML 85ML

Travel Packages

Suitable to carry a small amount of packaging, the best partner for excursions,
but don't exceed the maximum carrying capacity of civil aviation regulations.

旅行装---适合少量分装随身携带，短途旅行最佳伴侣，更不超过民航规定最高携带容量。
